

# Playdough recipe

## *Ingredients*

- 1 cup cold water
- Food coloring of your choice
- 1 cup white flour
- 1/2 cup table salt
- 2 tsp cream of tartar
- 2 tsp cooking oil
- Scented oil or extract (optional, just for scent)

## *Instructions*

Combine the ingredients in a heavy saucepan and stir to mix and review the color. The color will deepen when the playdough is cooked. To get really good purples and colors like black I bought gel food coloring. Cook over medium heat, stirring constantly until the Playdoh pulls away from the sides of the pan. About 3 to 5 minutes, or until it has the consistency of mashed potatoes or well, Playdoh. Remove from the heat and allow it to cool for 1 minute before kneading the dough. Store, after cooling, in a plastic container or resealable plastic bags. If stored in an air tight container or bag it can be kept for months.
